

SAURAV KUMAR

Patna, Bihar, India | +91 7546974234 | [Email](#) | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Computer Science graduate (B.Tech, AI specialization) with hands-on experience building full-stack and machine-learning applications using React, Node.js, Python, and TensorFlow. Skilled in AI-assisted development workflows (Claude, Cursor, ChatGPT) and prompt engineering to accelerate delivery. Strong foundation in Data Structures & Algorithms (150+ problems solved) and a track record of shipping production-ready, end-to-end projects.

EDUCATION

Bihar Engineering University, Patna — B.Tech, CSE (Artificial Intelligence)

Oct 2022 – Jun 2026

- CGPA: 7.3 / 10 | Coursework: OOP, Operating Systems, DBMS, Data Structures & Algorithms, Machine Learning, Web Technology

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, TypeScript, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, Bootstrap, Material UI

Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication, WebSockets

Databases: MongoDB, MongoDB Atlas, MySQL, PostgreSQL

AI / Machine Learning: TensorFlow, Scikit-learn, CNN, OpenCV, Pandas, NumPy, Matplotlib, Model Evaluation

Tools & Platforms: Git, GitHub, VS Code, Postman, Docker (basics), Vercel, Render, Jupyter Notebook, Google Colab

AI-Assisted Development: Claude, Cursor, ChatGPT — prompt engineering, workflow automation

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, System Design Basics, Agile/Scrum

PROJECTS

AI Website Builder — Multi-Agent AI Code Generation Platform [GitHub](#)

Next.js, TypeScript, React, Tailwind CSS, Node.js, Express.js

- Built a production-ready platform that converts natural-language prompts into complete, deployable full-stack web applications using a **multi-agent AI architecture** for planning, code generation, verification, and automated repair.
- Engineered an **AI Provider Gateway** (Z.ai primary, OpenRouter fallback) with retry policies, circuit breaker, cooldown management, and adaptive provider selection to maximize uptime and reduce failed generations.
- Designed a **Project Specification (ProjectSpec) engine** that structures raw requirements into development plans before code generation, improving output consistency.
- Built an automated **verification and repair pipeline** (syntax, import, dependency, build, and runtime error detection) that regenerates only affected components, and added real-time progress tracking with checkpointing/recovery using Clean Architecture.

Brain Tumor Detection & Classification using CNN [GitHub](#)

Python, TensorFlow, CNN, OpenCV, NumPy, Pandas, Matplotlib, Scikit-learn

- Built an automated MRI-based brain tumor detection system performing **multi-class classification** (Glioma, Meningioma, Pituitary) with real-time prediction and confidence scoring.
- Designed a lightweight CNN architecture optimized for fast inference and deployed it behind a responsive web interface for live predictions.
- Owned end-to-end development — dataset preparation, model training and evaluation, backend API, and frontend UI.

FitTrack — MERN Stack Fitness Tracker [GitHub](#)

MongoDB, Express.js, React.js, Node.js, Redux Toolkit, JWT, Material UI

- Built and deployed a full-stack fitness tracker with secure JWT authentication, workout CRUD, and **natural-language workout parsing**.
- Developed analytics dashboards with calorie tracking, interactive charts, and date-wise workout history, backed by MongoDB Atlas.

EXPERIENCE

Elevate Labs — Web Development Intern [Certificate](#)

May 2025 – Jun 2025

- Delivered 6 minor projects and 1 major real-world project using HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, REST APIs, and Git, using AI-assisted tools to accelerate development cycles.

SmartInternz — Salesforce Developer Virtual Internship

Dec 2023 – Jan 2024

- Completed an 8-week internship covering CRM fundamentals, Process Automation, Flows, Security, Apex, and Lightning Web Components; reduced manual process effort by 30% through automation flows.
- Earned Superbadges: Apex Specialist, Process Automation Specialist, and Developer Super Set.

CERTIFICATIONS & ACHIEVEMENTS

- Internshala — Web Development Training (HTML, CSS, Bootstrap, DBMS, PHP, React.js); scored 98%, recognized as top performer. [\[Certificate\]](#)
- Cisco — Python Essentials 1 & 2 (Python fundamentals, OOP, modules, functions, data handling). [\[Certificate\]](#)
- NPTEL (IIT Roorkee) — Cloud Computing. [\[Certificate\]](#)
- DSTE Bihar — Fundamentals of Machine Learning, Data Science, and Internet of Things. [\[Certificate\]](#)
- [LeetCode](#) — Solved 150+ Data Structures & Algorithms problems | Qualified GATE 2026.
