## PROFESSIONAL SUMMARY

Computer Science graduate (B.Tech, AI specialization) currently working as a Software Developer, with a solid Python foundation (NumPy, Pandas) and applied machine learning experience (TensorFlow, Scikit-learn, neural networks/CNNs). Hands-on with LLM APIs (Claude, OpenAI, Gemini) through a self-built multi-agent AI system covering prompt engineering, evaluation, and orchestration, with working knowledge of Hugging Face, LangChain, and vector databases (RAG). Full-stack background (React, Node.js, FastAPI exposure) to ship AI features end-to-end.

## EDUCATION

### Bihar Engineering University, Patna — B.Tech, CSE (Artificial Intelligence)

Oct 2022 – Jun 2026

- CGPA: 7.3 / 10 | Coursework: OOP, Operating Systems, DBMS, Data Structures & Algorithms, Machine Learning, Web Technology

## TECHNICAL SKILLS

**AI / Machine Learning:** TensorFlow, Scikit-learn, Pandas, NumPy, Matplotlib, CNN, Neural Networks, Model Training & Evaluation

**LLM APIs & Orchestration:** Claude, OpenAI, Gemini — LLM API integration, Hugging Face (model loading, inference), LangChain, prompt engineering & evaluation

**Vector DBs & RAG (Exposure):** Pinecone, Weaviate, Chroma, RAG pipelines, embeddings, retrieval evaluation

**Backend & APIs:** Python, FastAPI (exposure), Node.js, Express.js, REST APIs, JSON, JWT Authentication

**Languages, DevOps & Cloud:** Python, JavaScript, TypeScript, SQL, HTML, CSS, Git, GitHub, Docker, AWS (exposure)

**Core Concepts:** OOP, Data Structures & Algorithms, DBMS, Agile/Scrum

## EXPERIENCE

### Pashupatastra Solutions — Software Developer

Sept 2026 – Present

- Assist in building, testing, and debugging Python-based applications, APIs, and automation scripts.
- Work with senior developers on system architecture, clean code practices, code reviews, documentation, and sprint planning.
- Integrate third-party APIs, databases, and cloud services under guidance; troubleshoot issues and contribute to feature enhancements.

### Elevate Labs — Web Development Intern [Certificate](#)

May 2025 – Jun 2025

- Delivered 6 minor projects and 1 major real-world project using HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, REST APIs, and Git, using AI-assisted tools to accelerate development cycles.

### SmartInternz — Salesforce Developer Virtual Internship

Dec 2023 – Jan 2024

- Completed an 8-week internship covering CRM fundamentals, Process Automation, Flows, Security, Apex, and Lightning Web Components; reduced manual process effort by 30% through automation flows.
- Earned Superbadges: Apex Specialist, Process Automation Specialist, and Developer Super Set.

## PROJECTS

### Brain Tumor Detection & Classification using CNN [GitHub](#)

Python, TensorFlow, CNN, OpenCV, NumPy, Pandas, Matplotlib, Scikit-learn

- Built an automated MRI-based brain tumor classifier (Glioma, Meningioma, Pituitary) — CNN model design, feature/data preprocessing, training, evaluation, and confidence scoring.
- Deployed the model behind a REST API with a responsive web interface for real-time predictions.

### AI Website Builder — Multi-Agent AI Code Generation Platform [GitHub](#)

Next.js, TypeScript, React, Tailwind CSS, Node.js, Express.js

- Integrated multiple **LLM APIs** (Z.ai, OpenRouter) behind a unified AI Provider Gateway, applying **prompt engineering and iterative evaluation** to reliably turn natural-language prompts into deployable applications.
- Designed a **multi-agent pipeline** — planning, code-generation, verification, and repair agents — with checkpointing so long-running generations can resume from their last valid state.
- Built resilience into the LLM integration layer with retry policies, a circuit breaker, and adaptive provider failover to handle rate limits and API errors gracefully.
- Built an automated **verification and repair agent** that detects syntax, import, dependency, build, and runtime errors and regenerates only the affected components.

## CERTIFICATIONS & ACHIEVEMENTS

- Internshala — Web Development Training (HTML, CSS, Bootstrap, DBMS, PHP, React.js); scored 98%, recognized as top performer. [\[Certificate\]](#)
- Cisco — Python Essentials 1 & 2 (Python fundamentals, OOP, modules, functions, data handling). [\[Certificate\]](#)
- NPTEL (IIT Roorkee) — Cloud Computing. [\[Certificate\]](#)
- DSTE Bihar — Fundamentals of Machine Learning, Data Science, and Internet of Things. [\[Certificate\]](#) | [LeetCode](#): 150+ DSA problems solved | Qualified GATE 2026.
