

SAURAV KUMAR

Patna, Bihar | +91 7546974234 | [Portfolio](#) | mrsaurav1111@gmail.com | github.com/imSaurav06 | <https://linkedin.com/in/06saurav-kumar>

Computer Science undergraduate experienced building AI-powered applications and using AI-assisted development tools (Claude, Cursor) with strong prompt engineering to accelerate full-stack development; passionate about applying AI to real-world fintech products.

EDUCATION

Bihar Engineering University, Patna — B.Tech, Computer Science & Engineering (AI)

Oct 2022 – Jun 2026

CGPA: 7.3/10 | Coursework: OOP, Operating Systems, DBMS, Data Structures & Algorithms, Machine Learning, Web Technology

SKILLS

AI Tools: Claude, Cursor, ChatGPT — prompt engineering, AI-assisted development, workflow automation

Languages: C, C++, Python, JavaScript, SQL, HTML, CSS

Frameworks: React.js, Node.js, Express.js, Next.js, TypeScript, Tailwind CSS, Bootstrap

AI/ML: TensorFlow, Scikit-learn, Pandas, NumPy

Tools: Git, GitHub, MySQL, MongoDB, PostgreSQL, VS Code, Jupyter, Colab, REST APIs, JWT

PROJECTS

AI Website Builder — Multi-Agent AI Code Generation Platform

[GitHub](#)

- Leveraged AI-assisted development tools and prompt engineering throughout the build process to accelerate coding, debugging, and architecture decisions.
- Built a production-ready AI Website Builder (Next.js, TypeScript, React, Tailwind, Node.js, Express.js) converting natural language prompts into complete full-stack web applications.
- Designed a multi-agent AI architecture to analyze prompts, generate project plans, create application code, verify outputs, and perform automated repairs.
- Implemented an AI Provider Gateway (Z.ai primary, OpenRouter fallback) with retry policies, circuit breaker, and adaptive provider selection.
- Built a Project Specification engine and an automated verification/repair pipeline detecting syntax, import, dependency, build, and runtime errors.

Brain Tumor Detection & Classification using CNN

[GitHub](#)

- Built an automated brain tumor detection system (Python, TensorFlow, CNN, OpenCV, NumPy, Pandas, Scikit-learn) for MRI image analysis.
- Implemented multi-class tumor classification (Glioma, Meningioma, Pituitary) with real-time prediction and confidence scoring; owned end-to-end development from dataset to backend API and frontend UI.

FitTrack — MERN Stack Fitness Tracker

[GitHub](#)

- Built a full-stack fitness tracker (MongoDB, Express.js, React.js, Node.js, Redux Toolkit, JWT, Material UI) with secure auth, workout CRUD, natural language workout parsing, and analytics dashboards.

EXPERIENCE

Elevate Labs — Web Development Intern

May 2025 – Jun 2025 | [Certificate](#)

- Delivered 6 minor projects and 1 major real-world project (HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, REST APIs, Git), using AI-assisted coding tools to accelerate development and demonstrating strong full-stack and deployment skills.

SmartInternz — Salesforce Developer Virtual Internship

Dec 2023 – Jan 2024

- Completed an 8-week virtual internship covering CRM fundamentals, Process Automation, Flows, Security, Apex, LWC, and API integration, reducing manual effort by 30%.
- Earned Superbadges: Apex Specialist, Process Automation Specialist, and Developer Super Set.

CERTIFICATIONS & ACHIEVEMENTS

- [Internshala](#) — Web Development Training (HTML, CSS, Bootstrap, DBMS, PHP, React JS); scored 98%, top performer.
- [Cisco](#) — Python Essentials 1 & 2 (Python fundamentals, OOPs, modules, functions, data handling).
- [NPTEL](#) — Cloud Computing, completed under the guidance of IIT Roorkee.
- [DSTE Bihar](#) — Fundamentals of Machine Learning, Data Science, and Internet of Things.
- [LeetCode](#) — Solved 150+ Data Structures & Algorithms (DSA) problems | Qualified GATE 2026.
